## REGISTER NOW

### for a **FREE** Workplace Assessment

Members of Restaurant and Catering NSW have the opportunity to participate in our 2009 WorkCover Assist project to help lower the incidence of workplace injury by identifying risk that exists in your workplace.

The main protection for the employer – YOU – is to reduce the potential for injury by conducting ongoing risk assessment in your workplace. Your Association has been commissioned by WorkCover Assist to conduct up to 300 risk assessments for our members to help them identify risk in your workplace and to establish an ongoing process to continuously identify risk. No matter how often you conduct an assessment; there is always the possibility that you will find practices that increase the risk.

You will be assisted to identify and put in place strategies the prevent risk through injury. Certainly, by using this program, you will eventually identify more and more minor issues but that is the objective. The more you reduce risky work practices, the more likely that there will be LESS or NO loss of work due to injury in your workplace.
